

KODY DENNON

TECHNICAL PRODUCT LEAD | AI-first products and production systems

Humboldt County, California | Remote | kodydennon@gmail.com | linkedin.com/in/kodyd | kodydennon.com

Professional summary

Technical Product Lead with an AI-native delivery model and an operations-first background. Translate customer and operator problems into product rules, agent work, infrastructure decisions, verification gates, and production outcomes.

Best suited to AI-first teams that value high-leverage prototyping, cross-functional technical judgment, incident investigation, and accountability after launch.

Implementation disclosure: AI coding agents generate the implementation code. Kody owns product direction, requirements, service and infrastructure choices, investigation, acceptance, release scope, deployment, and production outcomes.

Capabilities

Product Leadership

- Requirements, workflows, product rules, and acceptance criteria
- Coding-agent task design, review cycles, and implementation direction
- Architecture and service proposal evaluation
- Scope, release, rollback, and production-readiness decisions

Delivery and Operations

- Dashboard and log inspection, reproduction, and root-cause direction
- Beta, deployment, live verification, and incident follow-through
- Data migration, reconciliation, audit trails, and operator runbooks
- Client communication and translation of operational needs

Technical Range

- Next.js, React, TypeScript, Rust, Python, and SQL
- Convex, Postgres, Supabase, and Odoo
- Cloudflare, Vercel, Docker, Linux, and GitHub
- Stripe, Resend, Twilio, Microsoft 365, and Google Workspace

Selected product evidence

Tides Pilates - **[Paid production ownership](#)**

70+ client accounts; live booking, memberships, payments, scheduling, instructor operations, communications, and administration.

Phoenix Ceramics - **[Paid migration](#)**

Production verification passed across 1,300+ product templates, 2,400+ variants, 2,500+ supplier records, 2,600+ contacts, and 4,000+ stock quants.

TrustForge - **[Released experimental open source](#)**

31 crates, ten verified npm packages, protocol and governance decision record, and explicit non-production maturity labeling.

ConvexAutoBackup - **[Released beta open source](#)**

Self-hosted backup and disaster-recovery control plane with web, CLI, Docker, native binary, and MCP workflows.

Blazeboard - Production product

Release contracts, local and live gates, rollback behavior, authorization evidence, billing, and controlled production onboarding.

TaskHatch - Production product

Pricing, access modes, authentication, relay authorization, customer and admin surfaces, billing, registry, and post-audit correction work.

Experience

Independent AI-Native Product Engineer | Self-Employed

October 2025 - Present | Humboldt County, CA / Remote

Direct AI coding systems across paid client platforms, production products, released open source, internal tools, and carefully labeled experiments.

- Directed approximately 1.59 million tracked source lines across 25 repositories; AI agents generated implementation while I owned product direction, infrastructure, investigation, verification, release decisions, and production outcomes.
- Serve as paid, ongoing product and technical owner for Tides Pilates, operating live booking, membership, package, payment, scheduling, instructor, communication, and administration workflows supporting 70+ client accounts.
- Directed Phoenix Ceramics' production-verified Odoo migration covering 1,300+ product templates, 2,400+ variants, 2,500+ supplier records, 2,600+ contacts, and 4,000+ stock quants.
- Deliver two additional paid engagements: an anonymized independent Pilates-practice platform and an anonymized creative-studio web presence.
- Published TrustForge across 31 crates and ten verified npm packages, reaching 4,298 crates.io downloads and 6.5K+ trailing-year npm downloads as measured July 18, 2026.
- Operate systems across Vercel, Cloudflare, Convex, Postgres, Docker, Stripe, email, DNS, release registries, native applications, and GitHub delivery workflows.

Founder / Owner / IT Solutions Specialist | Honest Tech Services, LLC

November 2021 - August 2025 | Eureka, CA

Founded and prepared the company in 2021; formal managed-service and field-service operations began in 2022.

- Formed the LLC, obtained a California reseller permit, secured CAGE and UEI registrations, and established operating policies, bonding, insurance, and compliance practices.
- Delivered endpoint and email security, monitoring, help desk, backup and recovery, networking, and on-site and remote support across 70+ endpoints.
- Negotiated ISP contracts producing 4x bandwidth upgrades and more than \$6,100 in client savings; established 14+ major partnerships and reseller relationships across 28+ vendors.
- Reduced unplanned downtime by approximately 35% through monitoring, patching, backup, and operational follow-through.

Education

College of the Redwoods | January 2026 - Expected 2028

Associate Degree for Transfer, Administration of Justice | Eureka, CA
